Citation Requirement	
Publications and research reports based on the ATUS database must cite it appropriately. The citation should include the following: Sarah M. Flood, Liana C. Sayer, and Daniel Backman. American Time Use Survey Data Extract Builder: Version 3.3 [dataset]. College Park, MD: University of Maryland and Minneapolis, MN: IPUMS, 2025. https://doi.org/10.18128/D060.V3.3 The licensing agreement for use of ATUS data requires that users supply us with the title and full citation for any publications, research reports, or educational materials making use of the data or documentation. Please add your citation to the IPUMS bibliography: http://bibliography.ipums.org/	
Conditions	
Users of ATUS data must agree to abide by the conditions of use. A user's license is valid for one year and may be renewed. Users must agree to the following conditions: (1) No fees may be charged for use or distribution of the data. All persons are granted a limited license to use these data, but you may not charge a fee for the data if you distribute it to others. (2) Cite IPUMS appropriately. For information on proper citation, refer to the citation requirement section of this DDI document. (3) Tell us about any work you do using the IPUMS. Publications, research reports, or presentations making use of ATUS should be added to our Bibliography. Continued funding for the IPUMS depends on our ability to show our sponsor agencies that researchers are using the data for productive purposes. (4) Use it for GOOD -- never for EVIL.	
Disclaimer	
The user of the data acknowledges that the original collector of the data, the authorized distributor of the data, and the relevant funding agency bear no responsibility for use of the data or for interpretations or inferences based upon such uses.

Variable: "YEAR"

Name:	YEAR
Label:	Survey year
Variable Text:	YEAR reports the survey year. There are several other variables that report date information on the diary day. See DATE for the date of the diary day, DAY for the day of the diary day, and MONTH for the month of the diary day. The ATUS interview took place 2-5 months after the final CPS interview. Date information is also available for the final CPS interview. See MONTH_CPS8 for the month of the final CPS interview and YEAR_CPS8 for the year of the final CPS interview.
Concept:	Technical Household Variables -- HOUSEHOLD
Start Position:	1
End Position:	5
Width:	5
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	YEAR is a four-digit numeric variable reporting the survey year.

Variable: "CASEID"

Name:	CASEID
Label:	ATUS Case ID

Variable Text:	CASEID is an identifying number unique to each household. CASEID is the same as TUCASEID which is on the public use ATUS files. For user convenience CASEID has been converted to a numeric variable. Users who are trying to match ATUS-X files with public use ATUS files must be sure that CASEID and TUCASEID are of the same type.
Concept:	Technical Household Variables -- HOUSEHOLD
Start Position:	6
End Position:	19
Width:	14
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	CodesCASEID is a 14-digit numeric variable uniquely identifying each household.

Variable: "SERIAL"

Name:	SERIAL
Label:	Household serial number
Variable Text:	SERIAL is an identifying number unique to each respondent.
Concept:	Technical Household Variables -- HOUSEHOLD
Start Position:	20
End Position:	26
Width:	7
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	CodesSERIAL is a 7-digit numeric variable.

Variable: "REGION"

Name:	REGION
-------	--------

Label:	Region										
Variable Text:	REGION reports the geographical region in which the respondent household is located. Northeast region: CT, MA, ME, NH, NJ, NY, PA, RI, and VT Midwest region: IA, IL IN, KS, MI, MN, MO, ND, NE, OH, SD, and WI South region: AL, AR, DC, DE, FL, GA, KY, LA, MD, MS, NC, OK, SC, TN, TX, VA, and WV West region: AK, AZ, CA, CO, HI, ID, MT, NM, NC, OR, UT, WA, and WY REGION was added to the data by the Census Bureau, not collected from respondents.										
Concept:	Geographic Variables -- HOUSEHOLD

Variable: "METRO"

Name:	METRO
Label:	Metropolitan and central/principal city status
Variable Text:	METRO indicates whether a household resided in a metropolitan area. For households within metropolitan areas, METRO also indicates whether the housing unit was inside or outside of a central/principal city. The Census Bureau adds this information itself and does not collect it directly from respondents. The Census Bureau adds this information itself and does not collect it directly from respondents. Some smaller metropolitan areas do not have a central city/outlying area distinction, so households in those areas will be included in the "metropolitan, not identified" category. While the Census Bureau's terminology for metropolitan areas and the classification of specific areas changes over time, the general concept is consistent: a metropolitan area consists of a large population center and adjacent communities that have a high degree of economic and social interaction. See MSASIZE for the population of the metropolitan area and METAREA for the specific metropolitan area. METRO was added to the data by the Census Bureau, not collected from respondents.

Variable: "MSASIZE"

Name:	MSASIZE
Label:	MSA/PMSA size
Variable Text:	MSASIZE reports the population size of the metropolitan area in which a household is located, if applicable. While the Census Bureau's terminology for metropolitan areas and the classification of specific areas changes over time, the general concept is consistent: a metropolitan area consists of a large population center and adjacent communities that have a high degree of economic and social interaction. MSASIZE information was added to the data by the Census Bureau, not collected from respondents.

Variable: "COUNTY"

Name:	COUNTY
Label:	County (FIPS code)
Variable Text:	COUNTY gives the Federal Information Processing (FIPS) state and county codes for the respondent's county of residence. Counties are assigned codes alphabetically within states. COUNTY also identifies areas that are not part of any specific county, such as independent cities. Geographic data below state level will not be disclosed if certain population thresholds are not met. In general, geographic divisions with fewer than 100,000 people will not be identified. For this reason, there are many unidentified counties. COUNTY was added to the data by the Census Bureau, not collected from respondents.
Concept:	Geographic Variables -- HOUSEHOLD
Start Position:	33
End Position:	37

Width:	5
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	CodesCOUNTY is a five-digit numeric variable. The first two digits give the FIPS state code; the last three digits give the FIPS county code. If the last three digits of COUNTY are 000, the county is not identified in the data. For a list of counties identified in each state, see the following links for the appropriate codes based on the final CPS interview (YEAR_CPS8 and MONTH_CPS8): Prior to April, 2004 May, 2004-July, 2005 August, 2005 onward

Variable: "METAREA"

Name:	METAREA
Label:	Metropolitan area (1990-based code)
Variable Text:	METAREA identifies the metropolitan area in which a household resided, using a 4-digit code scheme based on codes in use for the 1990 census. A metropolitan area, or metro area, is a region consisting of a large urban core together with surrounding communities that have a high degree of economic and social integration with the urban core. Metro areas are defined by the Office of Management and Budget (OMB), which occasionally makes significant changes to its protocols and regularly revises the delineations of metro areas to reflect current population distributions and commuting flows. Metro areas can cross state lines, and they are county-based except in New England. Users should be extremely cautious in making estimates for specific metropolitan areas because of the small sample sizes available. See also METRO, which specifies whether a housing unit was inside or outside the central city of a metropolitan area. METAREA was added to the data by the Census Bureau, not collected from respondents. Due to various challenges detailed below, IPUMS ATUS discontinued updates to METAREA after December 2022; however, it will continue to be available for 2003-2022 samples. See also (METRO), which identifies whether a household resided in a metro area and specifically whether it resided in a central/principal city of a metro area. METAREA uses two codes for cases where no metro area can be identified: 9999 (missing data) and 9998 (NIU-not in universe, for households not in a metropolitan area. The "not identified" code was used when geographic identification would have violated confidentiality requirements. It is not possible to maintain both consistent and comparable codes for all areas. The extents of metro areas may vary even while their codes remain the same. Some counties may be included in one metro area in one year and in another in a different year. Some metro areas were once independent and later became part of a larger metro area (e.g., Wilmington, DE-NJ-MD, which became part of the Philadelphia metro area). For these cases, it is necessary either to change existing codes to reflect the new hierarchy or maintain old codes with a different hierarchy.

The Census Bureau warns that, "One set of estimates that can be produced from CPS microdata files should be treated with caution. These are estimates for individual metropolitan areas. Although estimates for the larger areas such as New York, Los Angeles, and so forth, should be fairly accurate and valid for a multitude of uses, estimates for the smaller metropolitan areas (those with populations under 500,000) should be used with caution because of the relatively large sampling variability associated with these estimates."

Variable: "FAMINCOME"

Name:	FAMINCOME
Label:	Family income
Variable Text:	FAMINCOME reports the family's total annual income. This measure includes the income of all members of the household who are 15 years of age or older. Income includes money from jobs; net income from business, farm or rent; pensions; dividends; interest; Social Security payments; and any other monetary income received by family members. FAMINCOME was drawn from the final CPS interview, conducted 2-5 months before the ATUS interview. Family income was not updated at the time of the ATUS interview. However, individual earnings data for ATUS respondents was collected during the ATUS interview. See EARNWEEK and HOURWAGE.

Variable: "HH_SIZE"

Name:	HH_SIZE
Label:	Number of people in household
Variable Text:	HH_SIZE reports the number of people living in the respondent's household. The number of adults living in the household is also available (see HH_NUMADULTS), as is the number of children living in the household (see HH_NUMKIDS). HH_SIZE was collected at the time of the ATUS interview. Household size was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See HH_SIZE_CPS8.

Variable: "HH_CHILD"

Name:	HH_CHILD
Label:	Children under 18 in household
Variable Text:	HH_CHILD reports whether there is a child under the age of 18 living in the household. There are a number of other household composition variables that may be useful. HH_NUMKIDS reports the total number of children in the household, and HH_NUMOWNKIDS reports the total number of the respondent's own children in the household. Also, HH_SIZE reports the total number of people living in the household. HH_CHILD was collected at the time of the ATUS interview. Information on the presence of children in the household was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See HH_CHILD_CPS8.

Variable: "PERNUM"

Name:	PERNUM
Label:	Person number (general)
Variable Text:	PERNUM is constructed to uniquely identify each person within a given household. It is available for all household members whether they were present in the household at the time of the ATUS, CPS, or both. This is the only line number variable available for each person in every household. LINENO was assigned to all household members present at the time of the ATUS interview. LINENO_CPS8 was assigned to all household members present at the time of the final CPS interview, 2-5 months before the ATUS interview. Because household composition could change, PERNUM, LINENO, and LINENO_CPS8 may not match.

Variable: "LINENO"

Name:	LINENO
Label:	Person line number
Variable Text:	LINENO identifies each person within a given ATUS respondent household. It is only available for individuals who were in an ATUS respondent household at the time of the ATUS interview. ATUS respondents always have a LINENO value of 1. LINENO_CPS8 is a person identifier that was assigned at the time of the final CPS interview, 2-5 months before the ATUS interview. Because household composition may have changed between the dates of the CPS and ATUS interviews, LINENO and LINENO_CPS8 may not match. PERNUM is an additional person identifier that is available for all person records in the dataset.

Variable: "MBPL"

Name:	MBPL
Label:	Mother's birthplace

Variable Text:	MBPL indicates whether the person's mother was born in the United States, and, if not, her foreign country of birth. MBPL was drawn from the final CPS interview, conducted 2-5 months before the ATUS interview. Mother's birthplace was not updated during the ATUS interview. Information on father's birthplace is also available (FBPL), as is information on the respondent's birthplace (BPL).

Variable: "RELATE"

Name:	RELATE
Label:	Relationship to ATUS respondent
Variable Text:	RELATE reports the relationship of each household member to the ATUS respondent. In addition to all persons who live in the household, the household roster includes any of the respondent's own children (biological, step, or adopted) under the age of 18 who live in the respondent's household less than 50% of the time. "Own child" refers to the respondent's biological child, adopted child, or step child. "Other related person" may include the respondent's an aunt, cousin, nephew, mother-in-law, etc. Note: Not all non-resident children of the ATUS respondents are under age 18 despite the relationship label.

Variable: "EDUCYRS"

Name:	EDUCYRS
Label:	Years of education
Variable Text:	EDUCYRS reports the respondent's years of education. EDUC reports the highest level the respondent has completed. As degrees can take varying amounts of time to complete, EDUCYRS was created from a series of questions that assess the amount of time spent in various educational programs.

The following categories include people with the following types of education:

Twelfth grade: Respondents who report a twelfth grade education are assigned a value of 112. Respondents who receive a high school diploma are also included in this category, as are respondents who complete less than one year of college, including respondents who receive an associate's degree after less than one year of college.

College--four years: Respondents who report having completed four years of college credit are assigned a value of 216, as are respondents (in the CPS prior to 2015) who have a bachelor's degree but no post-graduate education.

College degree: Respondents who completed their rotation in the CPS in 2015 or later and who report having completed a bachelor's degree but no post-graduate education.

Master's degree: Respondents who completed their rotation in the CPS in 2015 or later and who report having completed a master's degree.

Master's degree--one year program: Respondents who report receiving a master's degree in a one-year program, or who report earning 1-6 graduate or professional course credits are assigned a value of 317.

Master's degree--two year program: Respondents who report receiving a master's degree in a two-year program, or who report earning more than six graduate or professional course credits are assigned a value of 318.

Master's degree--three year program: Respondents who report receiving a master's degree in a three-year program are assigned a value of 319.

EDUCYRS along with other information on education was drawn from the final CPS interview, conducted 2-5 months before the ATUS interview. Education was not updated at the time of the ATUS interview.

Variable: "SCHLCOLL"

Name:	SCHLCOLL
Label:	Enrollment in school or college

Variable Text:	SCHLCOLL reports whether the respondent was enrolled during the previous week in school, high school, or college/university, and, if so, whether they were enrolled full- or part-time. College or high school students who were currently on holiday or seasonal vacation were to answer yes, but those not taking classes during summer vacation were to answer no. SCHLCOLL was collected at the time of the ATUS interview. Information on school enrollment was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See SCHLCOLL_CPS8.

Variable: "EMPSTAT"

Name:	EMPSTAT
-------	---------

Label:	Labor force status						
Variable Text:	EMPSTAT indicates whether persons were part of the labor force--working or seeking work--and, if so, whether they were currently unemployed. Employment status was determined on the basis of answers to a series of questions relating to their activities during the preceding week. Those who reported doing any work at all for pay or profit, or working at least fifteen hours without pay in a family business or farm, were classified as "at work." Those who did not work during the previous week but who acknowledged having a job or business from which they were temporarily absent (e.g., due to illness, vacation, bad weather, or labor dispute) were also classified as employed, under the heading "employed - absent." Unemployed persons make up the third element of the labor force. Individuals were coded as unemployed if they did no work for pay or profit, did not have a job from which they were briefly absent, and answered yes to a question about whether they had been looking for work in the past four weeks. People who were temporarily laid off from a job were also classified as unemployed. Persons who were neither employed nor unemployed fall into the residual category, "not in labor force." Such individuals might be retired, disabled due to an illness lasting at least 6 months, occupied with other activities such as attending school or keeping house, or convinced that they are unlikely to find employment (discouraged workers). EMPSTAT was collected at the time of the ATUS interview. Employment status was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See EMPSTAT_CPS8. EMPSTAT_CPS8 distinguishes between not being in the labor force due to retirement, disability, or other reasons, but EMPSTAT does not.

Variable: "OCC2"

Name:	OCC2
Label:	General occupation category, main job
Variable Text:	OCC2 reports the respondent's primary occupation. This variable provides the same information as OCC, which provides the four-digit Census occupation codes. For the convenience of researchers who do not need the level of detail available in OCC, OCC2 collapses all occupations in the four-digit classification scheme into 22 broader occupations. In addition, researchers who prefer even less detail may use the first two non-zero digits of OCC2 to create an occupation variable with only 10 categories. OCC2 was collected at the time of the ATUS interview. Occupation information for the respondent's main job was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See OCC2_CPS8 (and OCC_CPS8). The Armed Forces occupational category is included in OCC2_CPS8 but not in OCC2. If a respondent has another (second) job, OCC2_OJ_CPS8 reports the occupation information for that job using the same industry categories as OCC2_CPS8. OCC_OJ_CPS8 reports occupation information for the second job using the four-digit Census industry codes. Industry information for the second job was not collected during the ATUS interview.

Variable: "IND"

Name:	IND
Label:	Detailed industry classification, main job
Variable Text:	IND reports the type of industry in which the person performed his or her primary occupation. "Industry" refers to the work setting and economic sector, while "occupation" relates to the worker's specific technical function. IND reports the four-digit Census industry code. More than 250 industries are represented. Researchers who would like broader industry categories may wish to use IND2, which collapses industry data into fewer, broader categories. IND was collected at the time of the ATUS interview. Industry information for the respondent's main job was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See IND_CPS8 (and IND2_CPS8). If a respondent has another (second) job, industry information was not collected at the time of the ATUS interview. However, information on the respondent's second job can be obtained from the final CPS interview. IND_OJ_CPS8 reports the industry information for that job using the same four-digit Census industry codes as IND. IND2_OJ_CPS8 reports industry information for the second job using the broader categories.

Variable: "FULLPART"

Name:	FULLPART
Label:	Full time/part time employment status
Variable Text:	FULLPART indicates whether the individual usually works full time or part time. Full time employment is considered to be 35 or more hours per week. Other variables also capture working hours. UHRSWORKT reports the total number of hours the individual usually works per week. FULLPART was collected at the time of the ATUS interview. However, information on hours worked was only collected at that time for respondents who changed jobs or employers since the final CPS interview, or whose earnings were allocated in the final CPS interview. For other respondents, information on hours worked was carried forward from the final CPS interview. CPSUPDATE may be useful as an indication that this information may be out of date. Full time/part time status was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See FULLPART_CPS8. Other hours variables collected during the final CPS interview include the total number of hours usually worked (see UHRSWORKT_CPS8) and the total number of hours actually worked last week (see HRSWORKT_CPS8).

Bottom codes: Reported hours that amount to less than one is recoded as 0 hours.

Variable: "EARNWEEK"

Name:	EARNWEEK
Label:	Weekly earnings
Variable Text:	EARNWEEK reports the respondent's usual weekly earnings in dollars. Weekly earnings are not available for persons who are self-employed. The only earnings information available on the self-employed is household income (FAMINCOME). Weekly earnings includes the usual overtime pay reported in OTPAY. EARNWEEK was collected at the time of the ATUS interview. However, earnings information was only collected at that time for respondents who changed jobs or employers since the final CPS interview, or whose earnings were allocated in the final CPS interview. For other respondents, earnings information was carried forward from the final CPS interview. CPSUPDATE indicates whether ATUS earnings were updated. Weekly earnings information was also collected at the time of the final CPS interview, 2-5 months before the ATUS interview. See EARNWEEK_CPS8.

002	Female								
099	NIU (Not in universe)								

Variable: "SPRACE"

Name:	SPRACE
Label:	Race (spouse or partner)
Variable Text:	SPRACE reports the racial category of the respondent's spouse or unmarried partner. More than one race may be reported. RACE was drawn from the final CPS interview, conducted 2-5 months before the ATUS interview. Spouse or unmarried partner race was not updated at the time of the ATUS interview. Therefore, respondents whose spouse or unmarried partner was not in the household at the time of the CPS interview have a value of 9998 for SPRACE because information on race is not available. In addition, SPRACE is missing for spouses of ATUS respondents whose last CPS interview occurred in 2002. RACE values for these ATUS respondents were hand-imputed using information collected using the pre-2003 CPS race categories, which did not allow for more than one race to be reported. No imputation was done for ATUS non-respondents or for

other members of respondents' households. Only ATUS interviews conducted between January 2003 and May 2003 are affected by this problem.

NIU (Not in universe)

Variable: "SPEARNWEEK"

Name:	SPEARNWEEK
Label:	Weekly earnings (spouse or partner)
Variable Text:	SPEARNWEEK reports the usual weekly earnings of the respondent's spouse or unmarried partner in dollars. Weekly earnings (EARNWEEK) are reported at the time of the final CPS interview, 2-5 months before the ATUS interview. Spouse's earnings are not updated at the time of the ATUS interview, though spouse's employment status (SPEMPNOT) is. Therefore, respondents whose spouse or unmarried partner was not in the household at the time of the CPS interview have a value of 99999.98 for SPEARNWEEK because information on spouse's earnings is not available.
Concept:	Spouse Characteristic Variables -- PERSON
Start Position:	196
End Position:	202

Variable: "HH_NUMOWNKIDS"

Name:	HH_NUMOWNKIDS
Label:	Number of own children under 18 in household
Variable Text:	HH_ NUMOWNKIDS reports the number of the respondent's own children under the age of 18 who live in the household. The total number of people in the household is also available (see HH_SIZE). The total number of children in the household is available as well (see HH_NUMKIDS). Other variables simply indicate the presence of a child in the household (see HH_CHILD) or the presence of the respondent's own child under the age of 18 in the household (see KIDUND18). The number of respondent's own children was collected at the time of the ATUS interview, 2-5 months after the final CPS interview.

Variable: "NOSCCRSN1"

Name:	NOSCCRSN1
Label:	Reason no secondary childcare of own household children
Variable Text:	NOSCCRSN1 reports the reason that the respondent did not report any secondary childcare activities for their own household children. Respondents who have a child of their own in the household under the age of 13 but report no secondary childcare for that child(ren) are asked why they did not perform any secondary childcare, which is reported in NOSCCRSN1. Respondents with non-own, household children under the age of 13 who report no secondary childcare for those children are also asked the reason they did not perform secondary childcare (see NOSCCRSN2). After completing the time diary, respondents with own, household children under the age of 13 were asked what times of the day those children were in the respondent's care. Users can apply a secondary child care filter in the extract builder when creating time use variables. Distinctions are available for the following groups: All children Household or own non-household children Own household children (not available for 2003) Own, non-household children (not available for 2003) Non-own household children (not available for 2003) Non-own, non-household children Secondary childcare time total variables are also available for all children (see SCC_ALL), for household or own non-household children (see SCC_HHNNHHOWN), for own household children (see SCC_OWNNHH, not available for 2003), for own, non-household children (see SCC_OWNNHH, not available for 2003), for non-own household children (see SCC_NOWNHH, not available for 2003), for own children (see SCC_OWN, not available for 2003), for household children (see SCC_HH, not available for 2003), and for non-own, non-household children (see SCC_NOWNNHH).

Variable: "SCC_ALL"

Name:	SCC_ALL
Label:	Total time spent on secondary childcare for all children
Variable Text:	SCC_ALL reports the total amount of time during the diary day that the respondent spent in secondary childcare for all children under the age of 13. This variable is calculated by summing the amount of time during each activity that the respondent reported having a child in care. The methodology for capturing secondary childcare changed between 2003 and 2004. In 2003, for household children and own, non-household children, secondary childcare time is not recorded if the respondent's main activity is sleeping (0101xx) or directly related to the care of household children (0301xx, 0302xx, 0303xx, 180301, 180302, 180303, or 180304). Secondary childcare is not recorded if all household children are asleep, but may be recorded for part of an activity if a child wakes up or goes to bed during the activity. For non-own, non-household children, secondary childcare time is not recorded if the respondent's main activity is sleeping (0101xx) or directly related to the care of non-household children (0401xx, 0402xx, 0403xx, 180401, 180402, 180403, 180404). Waking and sleep times are not asked of non-household children. Beginning in 2004, for household children, secondary childcare is not recorded if the respondent's main activity is sleeping (0101xx) or directly related to the care of household children (0301xx, 0302xx, 0303xx, 180301, 180302, 180303, or 180304). Secondary childcare is not recorded if all household children are asleep, but may be

recorded for part of an activity if a child wakes up or goes to bed during the activity. Secondary childcare of non-household children is not recorded if the respondent's main activity is sleeping (0101xx), directly related to the care of household children (0301xx, 0302xx, 0303xx, 180301, 180302, 180303, or 180304), or directly related to the care of non-household children (0401xx, 0402xx, 0403xx, 180401, 180402, 180403, 180404). Waking and sleep times are not asked of non-household children.

Secondary childcare time total variables are available for a variety of sub-categories of children as well: household or own non-household children (see SCC_HHNHHOWN), own household children (see SCC_OWNNHH, not available for 2003), own, non-household children (see SCC_OWNNHH, not available for 2003), non-own household children (see SCC_NOWNHH, not available for 2003), own children (see SCC_OWN, not available for 2003), household children (see SCC_HH, not available for 2003), and non-own, non-household children (see SCC_NOWNNHH).

Users can also apply a secondary child care filter in the extract builder when creating time use variables. Distinctions are available for the following groups:

All children

Household or own non-household children

Own household children (not available for 2003)

Own, non-household children (not available for 2003)

Non-own household children (not available for 2003)

Non-own, non-household children

User note: In a handful of cases, values in this variable may be different than those obtained by making a time use variable through the extract builder that specifies all activities and secondary childcare. The source of the difference is that the last activity respondents report may extend beyond 4:00 a.m. (see DURATION_EXT) and may also be one in which the respondents report secondary childcare. If the last activity extends beyond 4:00 a.m. and the respondent reports secondary childcare, SCC_ALL is created using the value in SCC_ALL_LN; alternatively, the extract builder restricts the total time in the day to 24 hours and does not allow the value of SCC_ALL_LN to extend beyond 4:00 a.m.

Concept:	Secondary Childcare Variables -- PERSON
Start Position:	223
End Position:	227
Width:	5
Variable Format:	numeric
Implied Decimal Places:	0
Coder Instructions:	Codes SCC_ALL is a 5-digit numeric variable. Values for ATUS respondents range from 0 to 1440 minutes. Members of the dataset who are not ATUS respondents are assigned a value of 99999.

Variable: "SCC_OWN"

Name:	SCC_OWN
Label:	Total time spent on secondary childcare of own children
Variable Text:	SCC_OWN reports the total amount of time during the diary day that the respondent spent in secondary childcare for own children under the age of 13. This variable is calculated by summing the amount of time during each activity that the respondent reported having an own child in care. Own children may or may not live in the respondent's household. Secondary childcare of own, household children is not recorded if the respondent's main activity is sleeping (0101xx) or directly related to the care of household children (0301xx, 0302xx, 0303xx, 180301, 180302, 180303, or 180304). Secondary childcare is not recorded if all household children are asleep, but may be recorded for part of an activity if a child wakes up or goes to bed during the activity. Secondary childcare of own, non-household children is not recorded if the respondent's main activity is sleeping (0101xx), directly related to the care of household children (0301xx, 0301xx, 0303xx, 180301, 180302, 180303, or 180304), or directly related to the care of non-household children (0401xx, 0402xx, 0403xx, 180401, 180402, 180403, 180404). Waking and sleep times are not asked of non-household children. Secondary childcare time total variables are available for other categories of children as well: all children (see SCC_ALL), household or own non-household children (see SCC_HHNHHOWN), own household children (see SCC_OWNNHH, not available for 2003), own, non-household children (see SCC_OWNNHH, not available for 2003), non-own household children (see SCC_NOWNHH, not available for 2003), household children (see SCC_HH, not available for 2003), and non-own, non-household children (see SCC_NOWNNHH). Users can also apply a secondary child care filter in the extract builder when creating time use variables. Distinctions are available for the following groups: All children Household or own non-household children Own household children (not available for 2003) Own, non-household children (not available for 2003) Non-own household children (not available for 2003) Non-own, non-household children

Secondary childcare of non-household children is not recorded if the respondent's main activity is sleeping (0101xx), directly related to the care of household children (0301xx, 0302xx, 0303xx, 180301, 180302, 180303, or 180304), or directly related to the care of non-household children (0401xx, 0402xx, 0403xx, 180401, 180402, 180403, 180404). Waking and sleep times are not asked of non-household children. Secondary childcare time total variables are available for other categories of children as well: all children (see SCC_ALL), own household children (see SCC_OWNNHH, not available for 2003), own, non-household children (see SCC_OWNNHH, not available for 2003), non-own household children (see SCC_NOWNHH, not available for 2003), own children (see SCC_OWN, not available for 2003), household children (see SCC_HH, not available for 2003), and non-own, non-household children (see SCC_NOWNHH). Users can also apply a secondary child care filter in the extract builder when creating time use variables. Distinctions are available for the following groups: All children Household or own non-household children Own household children (not available for 2003) Own, non-household children (not available for 2003) Non-own household children (not available for 2003) Non-own, non-household children

Variable: "ECYEST"

Name:	ECYEST
Label:	Eldercare provided yesterday
Variable Text:	ECYEST reports whether the respondent provided any eldercare or assistance yesterday. Eldercare is defined as providing care due to a condition related to aging that is an ongoing ailment or physical or emotional limitation that typically affects older people. Temporary conditions that do not require ongoing care, such as a broken leg, are excluded from the definition of eldercare. Users may refer to SEC_ALL_LN for more detailed information about when and how much time secondary eldercare was provided. Information about the individuals to whom respondents provided care is available through the extract system. Characteristics of care recipients include relationship, age, length of care provided, and an indicator of presence in the household. Additional information about eldercare is available elsewhere.

Variable: "ECPRIOR"

Name:	ECPRIOR
Label:	Eldercare provided in last 3 months
Variable Text:	ECPRIOR reports whether the respondent has provided any care or assistance for an aging adult during the three months prior to the interview, not including financial assistance or help respondent provided as part of his/her paid job. Eldercare is defined as providing care due to a condition related to aging that is an ongoing ailment or physical or emotional limitation that typically affects older people. Temporary conditions that do not require ongoing care, such as a broken leg, are excluded from the definition of eldercare. Information about the individuals to whom respondents provided care is available through the extract system. Characteristics of care recipients include relationship, age, length of care provided, and an indicator of presence in the household. Additional information about elder care is available elsewhere.

Variable: "ECFREQ"

Name:	ECFREQ
Label:	Frequency of eldercare provision in last 3 months
Variable Text:	ECFREQ reports how often the respondent provided eldercare related to aging during the three months prior to the interview. Eldercare is defined as providing care due to a condition related to aging that is an ongoing ailment or physical or emotional limitation that typically affects older people. Temporary conditions that do not require ongoing care, such as a broken leg, are excluded from the definition of eldercare. Users may refer to ECNUM for information about the number of recipients for whom the respondent provided care. Information about the individuals to whom respondents provided care is available through the extract system. Characteristics of care recipients include relationship, age, length of care provided, and an indicator of presence in the household. Additional information about eldercare is available elsewhere.

Variable: "COVIDTELEW"

Name:	COVIDTELEW
Label:	Worked remotely for pay due to COVID-19 pandemic (CPS)
Variable Text:	COVIDTELEW reports whether the respondent teleworked or worked from home for pay at any time during the previous four weeks due to the COVID-19 pandemic. This variable is part of a battery of five supplemental questions added to the CPS basic monthly survey in May of 2020 to measure the impact of the COVID-19 pandemic on the labor force. This variable was collected during the final CPS interview, conducted 2-5 months before the ATUS interview.
